

Abstract ABSTRACT OF THE DISCLOSURE

~~The invention relates to a snow board having a divided gliding surface. Said snow board comprises a one-part base, said base (10) consisting of two~~
5 ~~lateral gliding parts (2;3) extending in the longitudinal direction of the snow board (1) and a longitudinal bride (4) provided between the gliding parts (2;3) which are interlinked with the front area (5) and the rear area (6) of the snow board (1).~~

A snow board having an elongated body with concavely curved side
10 margins and an elongate web in its center separated from the body by lateral slots and joined with the forward and rear sections of the body in a curved configuration.
